# Our Mission Statement

**To be Scotland's leading provider of integrated recycling and waste management services to the benefit of the local and national economy and the environment.**

## Our Vision

Binn Group recognises that waste management, renewable energy, and food security are industries that are central to sustainable development and secure societies. We will seek to meet this challenge in innovative ways that make good business sense whilst reducing environmental impacts and increasing regional and national self-sufficiency in these key areas.

Moving towards greener and more sustainable regional and national economies will require the careful evaluation of new technologies and services. We will innovate in the development of industries that are synergistic and integrated to help develop a new industrial ecology for the 21st century in both the Tayside and Scottish economy.

Binn Group will seek to create new development and business partnership models that recognise the inter-relationship of industry, local authorities, Government agencies and communities in defining more sustainable long term societies whilst conducting its operations to the highest standards of environmental and good business practice.

**Allan MacGregor**  
**CEO Binn Group**

# About Binn Farm

## Background and History of the Binn Farm Site

Binn Group is Scotland's leading independent recycling and waste management company, providing a range of waste services across Scotland to commercial, industrial and local authority clients.

Our main commercial and industrial business operations take place at Binn Ecopark, Binn Farm near Glenfarg, which is situated 8km to the south of Perth. The Ecopark is considered to be an important strategic waste management site in the region encompassing Tayside, Fife, Edinburgh, Stirling and the Falkirk area. The land at Binn Farm sits within a topographic bowl and was considered to be an ideal location for the siting of a landfill site for the Perth and Kinross and the wider area. In 1993 planning consent was granted (Ref: 91/0650) for the development of a landfill site together with deposition of waste materials at Binn Farm. This site closed in 2014.

Since the development of the landfill site the Binn Farm site has expanded and diversified

with the development and erection of a landfill gas generating station, two separate Material Reclamation Facilities (MRF), a 30,000 tonne per annum food waste anaerobic digestion facility, in-vessel and greenwaste composting facilities, a waste wood processing and storage facility, and a 4-turbine windfarm. Planning consent has been secured for an energy from waste plant, with planned additions of battery and solar technologies.

The site processes over 500,000T of material per year, with a recycling rate over 90%, and has an established and growing Circular Economy focus on waste management, renewable energy and low carbon eco-innovation.

Together, this has culminated in the Binn Ecopark being one of the most fully integrated, low-carbon, next generation resource recovery complexes in the UK, employing over 150 people and providing significant economic benefits and added value to the local economy.

# Goods Vehicle Operator's Licence

## GOODS VEHICLE OPERATOR'S LICENCE

THIS LICENCE MUST NOT BE ALTERED OR DEFACED IN ANY WAY

Issued to:

**BINN GROUP LTD  
BINN FARM  
GLENFARG  
PERTH  
PH2 9PX**

Issued by:

Office of the Traffic Commissioner  
Scotland  
Quarry House  
Quarry Hill  
Leeds  
LS2 7UE  
0300 123 9000

Goods Vehicle Standard National

Licence number: OM1075292  
**NOT TRANSFERABLE**

This licence is in force from:

03/01/2008

This licence will continue for as long as you continue to meet its terms. However, it will come to an end if you do not pay the necessary continuation fee by the date required. The licence may also face regulatory action including revocation if you operate outside its terms. You have paid for an initial period of five years, which starts with the date the licence was issued. The continuation fee must be paid before the end of the month before that five year period comes to an end and every five years after that. Please see note 1 for further details.

This document is an operator's licence issued under the Goods Vehicles (Licensing of Operators) Act 1995 (the Act). The undertakings recorded on this licence have been given by the licence holder and are considered to be material to the grant of the licence. In the case of a licence first issued before 1 January 1996, the recorded undertakings include statements of intent made by the operator.

**The maximum number of motor vehicles and trailers authorised in accordance with section 6 of the Act is:**

**Motor vehicles** 77

**Trailers (inc semi-trailers)** 30

A handwritten signature in black ink, likely belonging to the Traffic Commissioner.

**Traffic Commissioner**

## HEALTH AND SAFETY POLICY STATEMENT

Binn Group recognise the important of providing safe and healthy working conditions for our workforce, and others who may be affected by our actions. We are committed to the prevention of work related injury or ill health and to planning and managing our operations to ensure compliance with all legal requirements and any other obligations.

To enable these duties to be carried out, it is our intention to ensure that responsibilities for Health & Safety matters are effectively assigned, accepted and fulfilled at all levels within Binn Group and its subsidiaries, Binn Skips Ltd and Binn Waste Management Ltd. Our Health & Safety management system will take account of our provision of waste management and resource recovery operations and will be adapted as necessary as the business grows and develops.

### **1: We will, so far as it is reasonably practical, ensure that:**

- Adequate resources are provided, so proper provision is made for health and safety.
- Actions are taken to eliminate hazards and to reduce risks – including ensuring that risk assessments are carried out and periodically reviewed.
- Our workforce, and their representatives, are consulted on health & safety matters and have the opportunity to participate in development of safe working conditions and safe systems of work.
- Arrangements for the use, handling, storage and transport of articles and substances for use at work are safe and without risks to health.
- All employees are provided with such information, instruction, supervision and training as necessary to secure their safety & health at work and the safety of others who may be affected by their actions.
- Where appropriate, health surveillance will be provided for employees.
- The provision and maintenance of all plant, machinery and equipment that is safe and without risk to health.
- The working environment of all employees is safe and without risk to health and adequate provision is made with regard to the facilities and arrangements for their welfare at work.
- The place of work is safe and that there is safe access and egress throughout the site.
- Monitoring activities are undertaken to maintain agreed standards.
- Objectives will be identified and actions implemented which allow us to deliver ongoing continuous improvement in our health & safety performance.

### **2: Duty of all employees while at work:**

- To take reasonable care for the health and safety of themselves and of the other persons who may be affected by their acts and omissions at work and co-operate with us, in fulfilling our statutory duties.
- Not to interfere with or misuse anything in the interest of health and safety.

### **3: General**

- This Health & Safety General Policy will be reviewed at least annually. It will be amended and updated as and when necessary. Communication of any change will be made to employees.
- There are established and maintained procedures for consultation and communication between all levels of management and employees on matters relating to health, safety and welfare.
- A more detailed list of areas of responsibilities is located within the management system.

# Environmental Policy

## ENVIRONMENTAL POLICY

Binn Group, through our waste and resource management services, is committed to continually reducing the environmental impact of its activities at our operational sites and in our transport provisions as well as in the wider environment. We recognize that by improving our environmental performance we can make a positive contribution for all of our stakeholders.

We appreciate that we all depend on the environment to provide all our basic needs both now and in the future and that the Earth's limited natural resources must be protected and managed sustainably to allow future generations to realise the economic prosperity that we enjoy today.

Our commitment to managing our local and wider impact through the implementation of our ISO 14001 environmental management systems will help us to also address stakeholder issues, meet contractual and other obligations, maintain regulatory compliance, improve the control of our activities and minimise any potential for environmental pollution. In particular we seek to:

- continually improve our environmental performance
- maximise the positive environmental outcomes of our waste and resource management, services
- make a positive contribution to minimising the impact of Climate Change
- minimise adverse environmental impacts and prevent pollution
- improve performance of our operations and keep these under review
- ensure that environmental responsibilities are understood in pursuit of this policy, legal and other voluntary compliance objectives and our overall aims
- maximise sustainable use of resources required for our operations
- protect our local environment
- help and encourage customers to become more environmentally conscious and to improve their own environmental performance

In order to do this, Binn Group will:

- set environmental performance objectives and monitor and control our activities
- raise awareness amongst staff and develop our skills
- provide information and support services for our customers
- seek to reduce greenhouse gas emissions from our operations
- work closely with S.E.P.A. and other regulators or policy makers
- manage our supply chain for sustainable provision of resources and where possible to support our local economy
- make a positive contribution where possible to Community Benefit

Environmental objectives shall be pursued which seek to enhance the performance of our activities and their progress shall be reported annually as part of our environmental review process.

## QUALITY POLICY

Binn Group, through its waste and resource management services, is committed to achieving the highest standards of service provision for our customers. Our goal is the continuous improvement of our services and we will do this by implementing quality management systems, which conform to ISO 9001, and which incorporate best business practice and regulatory compliance gained from ongoing engagement with customers, regulators, policy makers and other stakeholders.

Our core values are key to our success and provide a framework for defining our quality objectives. These values are:

- **Flexibility & Responsiveness** - engaging closely with our customers on their waste and resource management needs, we seek to be adaptable and to respond quickly to our client requirements
- **Approachability & Awareness** - providing our clients with friendly, competent and informed personnel who will seek to provide help and guidance in all of their waste and resource management needs
- **Dependability** – ensuring consistency and accuracy in all of our service provisions

This policy is integral to our business and improvement initiatives and as such will be communicated throughout our team and be enacted through our actions, systems and procedures. Our management review process shall ensure that the policy remains valid and that our objectives are monitored and progressed.

# Anti-Bribery, Tax Evasion & Corruption Policy

## Anti – Bribery, Tax Evasion & Corruption Policy

The Bribery Act 2010 came into force on 1 July 2011. It creates various new offences, including an offence which can be committed by commercial organisations that fail to prevent persons associated with that organisation from committing bribery on their behalf. This applies regardless of whether the person works or commits the offence in the UK or any other country in which Binn Group operates. However, it is a full defence for an organisation if it can prove that despite the bribery occurring, it has adequate procedures in place to prevent those persons associated with it from committing bribery. Tax evasion is any fraudulent activity that intends to divert funds from the public revenue. Basically, meaning tax evasion is the illegal non-payment or underpayment of tax. A facilitation offence will be committed where an individual or entity deliberately and dishonestly facilitates tax evasion.

An example of this would be if a member of staff knowingly facilitated a contractor or supplier's tax evasion. This may be achieved, for example, through false invoicing or making payments in cash or to different bank accounts than those previously agreed.

Binn Group's procedures must be proportionate to the bribery risks that it faces in relation to the nature, scale and complexity of Binn Group. Binn Group and its Directors are committed to the prevention of bribery, tax evasion & corruption by those employed and associated with it. Binn Group is committed to carrying out business fairly, honestly and openly, with zero-tolerance towards bribery, tax evasion or corruption.

This is achieved by:

- a. carrying out a risk assessment to ascertain the risk of bribery, tax evasion or corruption.
- b. instigating procedures proportionate to that risk.
- c. having good internal controls and record-keeping.
- d. securing the commitment of directors, managers and all staff to the prevention and detection of bribery, corruption or tax evasion.
- e. developing a culture in which bribery, corruption or tax evasion is unacceptable.
- f. undertaking due diligence procedures proportionate to the assessed risk of bribery corruption or tax evasion.
- g. effectively communicating this policy to all staff.
- h. training all staff to recognise bribery corruption or tax evasion, so that they can avoid it and be alert to possible instances of it.
- i. having clear procedures on what to do should bribery, corruption or tax evasion be suspected.
- j. monitoring and reviewing the effectiveness of these procedures and updating them as necessary to ensure that they remain effective.

### Scope

This policy applies to all those employed by and associated with Binn Group, including agency working on their behalf.

*Once printed, this document is uncontrolled*

#### **Offering bribes**

Binn Group expressly prohibits any person employed by or associated with it from offering, promising or giving any financial or other advantage to another person where it is believed that the acceptance of the advantage offered, promised or given in itself constitutes the improper performance of a relevant function or activity.

#### **Accepting bribes**

Binn Group expressly prohibits any person employed by or associated with it from requesting, agreeing to receive or receiving any financial or other advantage with the intention that a relevant function should be performed improperly as a result of the advantage or as a reward for performing the relevant function improperly. The improper performance of a relevant function in anticipation of receiving financial or other advantage is also prohibited.

#### **Bribing a public official**

Binn Group expressly prohibits the bribing of a UK or foreign public official in order to obtain or retain business or an advantage in the conduct of business.

#### **Relevant functions and activities**

Relevant functions and activities are any function of a public nature, any activity connected with the business, any activity performed in the course of a person's employment and activity performed by or on behalf of a body of persons where the person performing that function or activity is expected to perform it impartially, in good faith, or is in a position of trust by virtue of performing it.

#### **Hospitality and business gifts**

The Bribery Act 2010 does not seek to prohibit reasonable and proportionate hospitality, advertising, sponsorship and promotional or other similar business expenditure, as it is recognised that this constitutes an established and important part of doing business. However, hospitality, promotional and similar business expenditure can be used as bribes. Binn Group expressly prohibits the giving and receiving of hospitality/business gifts and similar where the intention in doing so is to receive or confer an advantage in return for giving or receiving the hospitality/business gift or similar.

#### **Raising Concerns**

If a member of staff has a concern about, bribery, tax evasion or the facilitation of tax evasion, they should normally first raise the issue with their immediate superior. This may be done orally or in writing.

If a member of staff feels unable to raise the matter with their immediate superior, for whatever reason, they should raise the matter with their Manager and/or the Finance Director.

# Modern Slavery Statement

## MODERN SLAVERY STATEMENT

Binn Group is committed to respecting and promoting human rights and to preventing modern slavery in all its forms in our business and supply chains. We recognise that modern slavery is a global issue and we aim to be part of the solution to eradicate it.

### Our Policies and Practices

- We have a zero-tolerance approach to modern slavery and are committed to ensuring that there is no forced, bonded or involuntary labour, human trafficking, or child labour within our business or supply chains. Our policies and practices are designed to prevent any form of modern slavery and are regularly reviewed to ensure they remain effective.
- We expect all our employees and suppliers to comply with our policies and practices relating to modern slavery.

### Our Supply Chains

- We recognise that our supply chains can be complex, and we are committed to working with our suppliers to ensure that they also have effective policies and practices to prevent modern slavery. We have implemented a risk-based approach to assess the risk of modern slavery within our supply chains and take appropriate actions to mitigate the risk.
- We regularly monitor our suppliers to ensure they comply with our policies and practices relating to modern slavery. We engage with our suppliers to ensure they understand the importance of preventing modern slavery and to identify opportunities to work together to eliminate it.

### Training and Awareness

- We believe that raising awareness and providing training is essential to prevent modern slavery. We provide training to our employees in the form of tool box talks, and our suppliers to raise awareness of the risks of modern slavery and to ensure they understand their responsibilities.
- We encourage our employees and suppliers to report any concerns they may have regarding modern slavery, and we have established a whistleblowing policy to ensure that concerns can be raised confidentially and without fear of retaliation.

### Conclusion

We recognise that eradicating modern slavery is a long-term challenge, but we are committed to taking the necessary steps to ensure that our business and supply chains are free from modern slavery. We will continue to review and improve our policies and practices to ensure we are doing everything we can to prevent modern slavery in all its forms.

# Carbon Reduction Statement

Ref: BGPOL 012  
Reviewed: 31/01/26

## Carbon Reduction Statement

At Binn Group, we are committed to playing a leading role in Scotland's transition to a low-carbon, circular economy. From our Glenfarg materials recycling facility in Perth, we continuously work to minimise our environmental impact through operational improvement, investment in sustainable technologies, and responsible resource management.

Our ambition is to reduce greenhouse gas emissions year on year while maximising the recovery of valuable resources. We aim to achieve this by optimising recycling and recovery processes, increasing renewable energy use across our site, and collaborating with partners, clients, and local communities to embed sustainable practices.

Through transparency, innovation, and a clear focus on measurable action, Glenfarg is dedicated to achieving Net Zero in line with Scotland's national targets — while helping our clients achieve their own sustainability goals.

We recognise that our clients rely on us not only for waste management services, but as a trusted partner in reducing their environmental footprint. We therefore commit to reducing our own emissions while actively supporting our customers to reduce theirs.

### Low-Carbon Operations

We aim to improve energy efficiency across plant and equipment, transition our fleet to electric or low-emission vehicles, and install or procure onsite renewable energy (solar, biogas, or wind where feasible). We also aim to deploy AI and specialist fleet management tools to optimise routing and vehicle utilisation.

### Circular Economy & Resource Recovery

We aim to expand recycling capability to divert more material from landfill, develop closed-loop services for priority waste streams (including construction and demolition wastes), and continue to grow Binn Eco Park to attract end markets onsite. This aims to improve recycling efficiency, reduce road mileage to external outlets, and support zero-waste-to-landfill solutions for our clients wherever practicable.

### Innovation & Partnerships

We aim to continue developing Binn Eco Park to maximise environmental and operational benefit for customers, provide verified carbon data linked to the waste we process, and support clients in understanding Scope 3 emission savings achieved through our services.

### Offsets and Insetting — Last Resort Only

Where emissions cannot be eliminated, we aim to use verified offsets such as UK-based carbon removal or reforestation projects. Our priority remains insetting through improved water resilience via our Site Water Management Plan, habitat enhancement through native tree planting and landscaping, and collaboration with local communities and suppliers to strengthen climate resilience and biodiversity.

### Carbon Reduction Planning

By the end of 2026, we aim to establish structured data collection to quantify our Scope 1 and Scope 2 emissions and begin formal engagement with suppliers and value-chain partners to assess Scope 3 emissions.

By the end of 2027, we aim to publish a formal Carbon Reduction Plan setting out our emissions baseline, reduction targets, and delivery roadmap to Net Zero.

Through continuous improvement, responsible investment, and partnership working, Binn Group is committed to delivering measurable carbon reduction, advancing the circular economy, and supporting our clients on their journey to Net Zero.
